

Starbond KBL-500 Black Medium-Thick CA Glue is a flexible, rubber-strengthened, super glue that dries jet black. This amazing adhesive has impact and shock absorbing properties, and can expand and contract with its surrounding environment, making it the perfect glue for reckoning speakers, hobby R/C car tires, woodturning inlays, and heavy-duty bonding. It's also ideal for hiding imperfections, filling dark voids, and accenting specific areas in your projects, particularly in spalted wood. KBL-500 can also be sanded down and polished to a high-gloss finish and will not crack in a malleable environment!

Professional Tip: Colored CA's have a longer bonding time because of the added rubber compound. It can take much longer than the typical minute or two to dry when large amounts of the adhesive are applied. We recommend our Starbond Accelerator to reduce the bonding and drying times.

WARNING: Use of this product can expose you to chemicals like Carbon Black and Methyl isobutyl ketone, which are known to the state of California to cause cancer. For more information, please visit: www.p65Warnings.ca.gov.

Use Starbond KBL-500 Black Medium CA Glue to:

- Create black accent designs on spalted wood and other projects
- Bond different materials to one another, such as wood, metal, glass, and rubber
- Blend into similarly colored surfaces
- Add polish and shine to your projects
- Glue tires and lock threads on R/C cars
- Bond top plate to the frame in speaker manufacturing – it can also attach: spider to cone assembly, dust cap to the cone, gasket to surround, surround to frame or cone, cone to coil connections, dressing lead wires to the cone, and it can be used in select dust cap applications
- Bond top plate to frame in speaker manufacturing
- Repair and fill cracks, inclusions, voids, and knots in wood

For Use On:

- Wood
- Metal
- Rubber
- Leather
- Ceramics
- Gemstones
- Rocks & Minerals
- Carbon Fiber
- Fiberglass
- Most Plastics

Available in 2 ounce, 16 ounce, and 44 lb. (20kg)

Starbond KEG-500 Flexible Heavy Medium CA Glue is a flexible super glue that has impact and shock absorbing properties. Also used as an outer coat, it's possible to sand down and polish KEG-500 to a high-gloss finish. This adhesive is four times stronger than our standard CA glue, and has a higher resistance to heat, humidity, and natural weathering, making it ideal for shoe and boot repair, furniture repair and restoration, and archery applications for arrow fletching and inserts. With bonding times as long as one minute, this is the perfect glue for heavy-duty bonding to form strong repairs!

Professional Tip: We recommend our Starbond Accelerator to speed up the bonding and drying times, depending on the materials involved and the volume of glue used.

Use Starbond KEG-500 Flexible Heavy Medium CA Glue to:

- Bond dissimilar materials, such as wood, metal, glass, and rubber
- Replace certain thread lock applications
- Quickly repair auto paint and body work
- Frag coral
- Glue fly lines, dumbbell eyes, large streamers, and big foam flies for fly fishing
- Repair and fill cracks, voids, inclusions, and knots in wood
- Lock threads in R/C cars
- Assemble model airplanes and R/C cars
- Form CA hinges, providing flexibility to bond moving parts together, as in model airplanes
- Bond together various kayak panels (faster set time than epoxy)
- Install cue tips onto pool cues
- Bond fiberglass to a variety of materials
- Repair shoes and boots
- Repair marble, granite, and quartz
- Perform taxidermy
- Glue dental lab articulators
